SPA PHILOSOPHY

Sun Spa Resorts Pvt Ltd is named after the life-giving sun. This energy source epitomizes what the Sun Spas are about – an eternal light with the promise of warmth and youthful energy that extends through our treatments to harmonize the body, mind and soul.

Sun Spa's logo depicts the 'frangipani' flower, locally known as 'gul champa', growing under the protection of the sun. This beautiful and timeless flower is well known for its aesthetic and medicinal values on top of its delightfully fresh and fragrant scent. These amazing qualities are transferred into our spa philosophy by taking a holistic approach to health and wellness incorporating the healing principles of the East and West with a specific focus on the ancient traditional healing practices of Ayurveda as well as classic Aromatherapy. All our services are based on a fundamental 'Back-To-Nature' concept, which is reflected in the abundance of natural ingredients we employ to enrich our guests' spa-experience.

Our SunSpa treatments are designed to restore balance and harmonize energies as they lead our guests on a journey through the cycle of nature.

The layout of the spa, the facilities and décor are important in ensuring that our clients' journey achieves its desired effect. The spa has been designed to promote a sense of relaxation, allowing clients to unwind and de-stress in comfortable and tranquil surroundings. From the moment you enter any Sun Spa sanctuary you will feel the peace and harmony emanating from within.
